

Merlex Opens Color Lab in Pacoima & Color App on your PC or Cell Phone

(Merlex Stucco, Inc., January 12, 2010) Orange, CA – Merlex is pleased to announce a few service enhancements available to customers. First, a color lab has been added to their Valley location for customer convenience. The new lab makes the same great service available at our main Lab in Orange available to customers in the L.A./Ventura area, typically within a few days. For any sample requests or inquires in the Valley area please call Alberto Duran at 818.834.9200 or contact via email, pacoima@merlex.com.

The second service enhancement is the Merlex Color App. From any PC or cell phone with web access, you can enter a Merlex color and find out the Base it goes with and if it is extra cost. This will allow distributors to access our database from their desk within seconds and avoid extra phone calls. Contractors and builders in the field can use their cell phones to get the same information -- all part of Merlex's continuing quest to make our customers' jobs a little easier.

Merlex's primary focus is manufacturing quality stucco products. We support our industry-leading products with exceptional service, from our salespeople to our website, and now including our Color App and Pacoima Color Lab. Suppliers, plastering contractors, and builders can benefit from the additional features available at Merlex Stucco. After 47 years, we remain dedicated to premium products and service. For further questions or inquiries, please call 714.637.1700, or visit online at www.merlex.com.
