

**Blazeframe Industries**

8805 148<sup>th</sup> Ave NE  
Redmond, WA 98052, USA

Press release date: December 29, 2010

Redmond, WA- **Blazeframe Industries** has recently hired Aaron Rosin as their Architectural Representative. Rosin, whose office is in Redmond, Washington is responsible for providing support of Blazeframe innovative solutions to the architectural design and code body communities throughout the United States.

“We’re excited to have Aaron on board,” said Jim Klein of Blazeframe Industries. “His experience and presence in the architectural community brings additional support as a liaison between the design and contractor communities assisting in our continued growth and expansion plans.”

Blazeframe is an innovative steel framing, fire stop system that provides over 1,000 assembly configurations; reduced down to 26 UL’s to simplify the search for the right solution. An intumescent strip affixed to steel profiles simultaneously frames, fire stops, and sound seals both dynamic and static joints. The Blazeframe line of fire rated and non-fire rated framing products provides solutions and advantages to owners, architects, and contractors in design, life-safety, productivity, and environment.

For more information, contact: Aaron Rosin at 425-869-2811 or [aaron@blazeframe.com](mailto:aaron@blazeframe.com).
