## CEMCO ANNOUNCES NEW MILL CERTIFICATION POLICY

CEMCO's Mill Certification Policy is to provide **Fully Traceable** Mill Certificates for all steel utilized in the production of the CEMCO products. Mill Certificates will be provided, free of charge, upon the request of the customer as required for compliance with the construction documents.

Mill Certificates shall:

1. Be provided by CEMCO Engineering (IAS TL 316) which is in compliance with ANSI/ISO/IEC Standard 17025 and is certified to perform the required testing.
2. Be formatted in a Certified Test Report (sample attached).
3. Be available for Structural and Non-Structural stud and track framing members.
4. Be **100% Traceable** to each stud and track member which will be marked in accordance with ASTM C955 (Structural) and ASTM C645 (Non-Structural) and will include the slit coil number.
5. **NOT Apply** to accessory items such as flat strap, angles, beads and trim which are not required to have mill certificates.
6. The CEMCO mill certificates shall contain the following information:
  - A. Heat Number
  - B. Coil Number
  - C. Nominal thickness
  - D. Galvanized Coating weight
  - E. Yield Strength
  - F. Tensile Strength
  - G. Elongation %
  - H. Test Standard A370
  - I. Certified Technician Signature
7. When requested at the time of order placement, Mill Certificates will be issued with each order at time of shipment.
8. Requests of Mill Certificates for **additional products** such as those listed above in item 5, or for **additional information** beyond the scope of this policy, are available provided a **48 hour notice** is given and will be charged at **\$10 per ton**.

*California Expanded Metal Products Co. is the premier manufacturer of cold-formed steel framing and metal-lath products in the Western United States. Its steel-framing product segments include FAS™ head-of-wall products, Sure-Span® steel framing floor joist system, SureBoard® for shear-wall panels, ViperStud® interior stud framing system, metal lath and water-management products along with its SSMA Code Certified steel framing products. Founded in 1974, CEMCO is the leader in quality, service, and product development, and offers one of the broadest product lines available in cold-formed steel framing used for both the commercial and residential construction markets.
